DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Response to Amendment

2. Receipt is acknowledged of the Amendment After Final filed January 19, 2005. The amendment includes amended claims 3-8 and cancelled claims 1 and 2.

Information Disclosure Statement

3. The information disclosure statements filed October 13, 2004 and December 6, 2004 fail to comply with 37 CFR 1.98(a)(1), which requires the following: (1) a list of all patents, publications, applications, or other information submitted for consideration by the Office; (2) U.S. patents and U.S. patent application publications listed in a section separately from citations of other documents; (3) the application number of the application in which the information disclosure statement is being submitted on each page of the list; (4) a column that provides a blank space next to each document to be considered, for the examiner's initials; and (5) a heading that clearly indicates that the list is an information disclosure statement. The information disclosure statement has been placed in the application file, but the information referred to therein has not been considered.

Allowable Subject Matter

4. Claims 3-8 are allowed.

The following is an examiner's statement of reasons for allowance: none of the cited prior arts of the record discloses, teaches, or fairly suggests the claimed features comprising,

Art Unit: 2876

among other things, a correction information determination part configured to determine whether correction information transmitted from the information input apparatus pertains to the document managed by the server apparatus; and a correction part configured to correct the document based on the correction information when the correction information determination part determines that the correction information pertains to the document managed by the server apparatus. The cited references also fail to disclose a server including a determination part configured to determine whether there is a position identification code assignable to a document to be printed on a paper medium when information on the document and an instruction to perform position identification code printing on the paper medium are received from the client apparatus. Accordingly, one of ordinary skill in the art would not have been motivated to modify teachings of prior art to meet the claimed limitations as set forth in the present claimed invention.

After further search and thorough examination of the present application and in view of the Applicant's arguments and amendments, claims 3-8 are found to be in condition for allowance over the prior art made of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
